Light Is Culture

Lighting is an essential aspect of modern culture, and it plays a crucial role in shaping our experiences and perceptions of the world around us. As a leading manufacturer of lighting solutions, LICLLAB understands the power and importance of light in our everyday lives.

At LICLLAB, we strive to create lighting products that are not only functional, but also aesthetically pleasing and culturally relevant. Our team of designers and engineers work closely together to create innovative and unique lighting solutions that reflect the latest trends and styles in the industry.

One way that LICLLAB incorporates culture into our lighting designs products is through the use of colors. LED selection BIN can have a powerful impact on our emotions and perceptions, and we carefully select the colors used in our lighting products to create a specific mood or atmosphere. For example, warm colors such as red and orange can create a sense of warmth and intimacy.

In addition to our focus on design and aesthetics, LICLLAB is also committed to sustainability and environmental responsibility. We understand that light is a valuable resource, and we strive to create lighting solutions that are energy efficient and long-lasting. This not only benefits the environment but also helps to reduce the costs of operation and maintenance for our clients.

Overall, LICLLAB is committed to creating lighting solutions that are not only functional, but also culturally relevant and visually striking. We believe that light is not just a practical necessity, but also an important aspect of our culture and everyday lives.

LICLLAB - Light Is Culture

Many companies just offer quick solutions without any reliability, offering products that aren't ready. Real products need to be tested and guaranteed.

At LicLLab, we provide real solutions guaranteed 100%.

We have been in the lighting Industry for the last 15 years and we have been doing what we like to do. Our passion is Lighting, and Lighting Is Culture. We Design & Manufacture Architectural Lighting and provide the right solution and service that let's our clients be satisfied.

We provide solutions and custom light fitting in collaboration with Lighting Designers, Consultants, Architects & Final Clients. Our R&D department team are always looking for best design with the best performance and modern technology.

Our Vision

We want all Architects, Consultant & the Lighting Design Community to have their laboratory for designing the products they desire.

The lighting community becomes stronger every day and is always looking for the best service with the

latest technology. We don't want to just be a lighting manufacture, but we want to be the best Laboratory for the lighting community.

What We Do?

We design and build lighting products. Whatever the project, the final products are either standard or custom-made and produced in our in-house manufactory.

Everything we do is personalized, our designers and Engineers work as partners in a team, in close collaboration with our clients. The interaction between design and build, embedded in a fabric of good communication, is the essence of LicLLab.

We take care of each project phase, from on-site visit, exploratory studies, design and technical drawings to the final production and test & commissioning. Depending on the commission, we either create a new product from scratch, or we repurpose a product from our archival, resulting in a product usable in various spaces. The final product and accessories are always produced in our manufactory, and therefore quality-certified.
